

ENVIRONMENTAL POLICY

Infinet Service Solutions will conduct its operations to a clear and consistent policy of sustainable production that embraces the following four commitments:

- Compliance with relevant environmental legislation and industry codes of practice as a minimum performance standard
- Prevention of pollution
- Provision of adequate resources for effective implementation of the environmental management programmes
- Continual improvement of the Environmental Management System to achieve improved environmental performance

The Management has defined an Environmental Policy that includes these commitments and sets out the intentions and principles for environmental performance. The policy complies with the requirements of ISO 14001 and provides a framework to set objectives and targets for environmental improvement.

A statement of the policy is published and communicated to all employees and made available on request to the public, contractors and suppliers. Suppliers and contractors are made aware that Infinet Service Solutions has implemented an EMS.

The policy is reviewed at the annual Management Review to ensure it remains appropriate to the scale and nature of the company's operations. In particular the relevance of the policy will be considered in relation to the environmental impacts of the company's activities, products and services and whether it continues to fulfil the aims for environmental protection. It is also reviewed for consistency with other management policies (e.g. Health & Safety and Quality).

Eddie Evans

Director of Quality and Environment
